Every book is in an intimate sense, a circular letter to the friends of him who writes it.

They alone take his meaning; they find private messages, assurances of love, and expressions of gratitude dropped in them in every corner. The public is but a generous patron who defrays the postage.

Robert Louis Stevenson

give eternal blessings in this gift,  
and thank God for books.

Robert Louis Stevenson-

-9/-

A good look, whether a road  
or not, is one that leaves you  
farther on than when you  
take it up - 9/-, when you  
drop it, it drops you down in  
the same old spot with no  
fine outlook, <sup>no, cleared vision,</sup> no stimulated  
desires for that which is better  
and higher, it is in no sense  
a good look. Anna Barnes.

- A Warning -  
MEMORANDA

I have a notion the  
books on the shelves are  
just as much persons  
as we are ourselves.  
And when you are older  
you'll find this is  
true, then be careful,  
my friend, and make  
books like you.

Gelett Burgess.

O for a home and a sharie  
noise, either in a room or  
out; with the green  
leaves whispering overhead,  
or the street cries all  
about. (here I may read all  
at my ease, both of the new and  
old); For a gollie gode Booke  
whereon to looke is better to  
me than Golde -

Walter Rime.

Nothing More -  
MEMORANDA

Not as ours the books of old -  
Things that steam can stamp  
and fold; - Not as ours the  
books of yore - Rows of type  
and nothing more - Then a  
book was still a Book, -  
Where a wistful man might  
look, - Finding something  
through the whole, Beating -  
like a human soul.

- Custer Dobson -

Something Still -

In that growth of day by day,  
When to labor was to pray,  
Surely something vital passed  
To the patient page at last;  
Something that one still perceives  
Equally present in the leaves;  
Something from the worker lent;  
Something mute - but eloquent,  
Custer Dobson.

MEMORANDA.

The following work and the quotation from it came to my notice at the Treasures Room at the Harv. Library during a lecture on Rev. Antislavery pamphlets by Dr. Edward Channing in the Spring.

"Military collections and remarks - Major Doulsen.

New York - 1777"

Published apparently for the benefit of widows and children of those slain at Lexington and Bunker Hill.

On page 190 is the following:  
 Dip arrows in matter of small pox and throw them at the American rebels, in order to inoculate them.

This would sooner disband  
these stubborn, ignorant, en-  
thusiastic savages than  
any other compulsive measures.  
Such is their dread and fear  
of "that disorder".

In all but two copies of  
this work, the foot-note con-  
taining this piece of advice  
is cut out, but whether by  
the author or printer cannot  
be known.
